# Your Highway to GSM/3G Networks VoIP/PRI – GSM/3G Multichannel Gateway

Ideal tool for alternative carriers
Scalable capacity (up to 32 GSM/3G channels)

VoIP interface
Up to 8 SIM cards per channel
2 ISDN PRI connections
Sophisticated LCR
Voice and SMS transmission
Worldwide use
Comfortable remote control and management

## **ATEUS® – StarGate**

Your Highway to GSM/3G Networks VoIP/PRI – GSM /3G Multichannel Gateway

The *ATEUS*<sup>®</sup> – StarGate is a VoIP/PRI GSM/3G gateway with up to 32 GSM/3G channels. It's an ideal equipment for large corporations with high proportion of calls to GSM/3G networks and for alternative carries as the StarGate gateway is a great tool for terminating calls providing maximum performance, stability and reliability. Thanks to its scalability you can create a tailor made solution according to your needs. You can benefit from a mixture of GSM/3G channels, 2 ISDN PRI ports, VoIP interface and additional software solutions. If the StarGate is used, you gain substantial savings on calls, as all calls aiming for GSM/3G networks are routed through this gateway. Thanks to the efficient and sophisticated LCR (Least Cost Router), the calls are always routed in the cheapest possible way as there is taken into consideration time of call, prefixes of operators, free minutes on the SIM cards. As the StarGate gateway has been enhanced with a VoIP interface, there is no need to install an external VoIP gateway. There are 2 main advantages of 2 PRIs over to just 1 PRI port:

- no need of any additional PRI card in the company PBX
- no need to change the configuration of the PBX, everything is programmed in the gateway

SMS and Voice CallBack is a software solution with authorization and restriction capabilities. It's mostly utilized by company staff who are in the field. This software contributes on higher savings on calls.

### **ATEUS® – StarGate**

#### Features:

- Up to 32 GSM/3G channels (hot swappable)
- 3G network support
- Up to 8 SIM cards per channel
- Up to 2 ISDN PRI interfaces
- VoIP interface
- Efficient Least Cost Routing (LCR) according to free minutes, prefixes of operators, call time etc.
- Dynamic Clip Routing
- Large memory (250 thousand) for detailed call data records
- Correct tone detection
- SMS and Voice CallBack
- Support of SMS sending and receiving
- Antenna splitter two high gain YAGI antennas for the whole system
- Comfortable remote control and management
- Support of external number portability database (NPdb)
- Compact design
- Worldwide use (all frequencies are supported) \*

#### **Technical parameters**

#### PRI ISDN
